Overview

Hi there, I'm a front-back developer interested in being part of your developer group, I'm an inveterate developer, I am 20 years old, I love programming, imagining and building things, I look for the opportunity to develop amazing things, maybe we can do it together. Just contact me, actually I'm nice.

Projects

💻 My Commerce

An MPA (multiple page app) school project, trying to imitate ecommerce, with login and Auth token Bearer.

- The web was developed in record time 2 days, it was styled with Tailwind CSS.

DEPLOYMENT REPO

💻 Pokedex App

A modest MPA (multiple page app) school project made with react for the interface, with the Pokémon Api to show data of all the Pokémon.

- The app was developed in a máximum time of two days, in the process I learned to use React router.

DEPLOYMENT REPO

💻 User Dashboard

A SPA (single page app), as a simple example of a user management dashboard doing requests to an API for user management.

- The app was developed in one day, from start to finish, consuming an api with axios and react for the development of the interface
